7 September 2026

ESCP ranks 6th worldwide in Financial Times Master in Management ranking

In the Financial Times annual ranking of the top 100 Master in Management programmes, ESCP comes in 1st across the United Kingdom, Germany, Spain, Italy and Poland, 3rd in France, 5th in Europe, and 6th worldwide, moving up one place from 2025.

ESCP's Master in Management (MiM) continues to stand out for the international scope of its programme and community. The programme ranks **4th globally for international course experience** and has both the **most international student cohort (98%) and faculty (94%) among the global top 10.**

Delivered over two years, with the opportunity to study across two to five European countries, ESCP's MiM shapes accountable, bold and creative leaders, while enabling them to build an academic journey tailored to their ambitions. With **more than 70 specialisations, 55 dual degree partnerships, and 6 European campuses**, students can combine disciplines, sectors and geographies to develop the breadth of skills increasingly demanded by a fast-changing global market.

With more than 1,200 students graduating every year — the largest cohort among the FT MiM top 100 — ESCP's MiM has the scale to make a meaningful impact across organisations, industries and countries worldwide. This reach is matched by an overall satisfaction rate of 8.81. According to the 2026 FT ranking, **100% of the most recent ESCP MiM class found employment within three months of completing the programme.**

"This result is a strong recognition of the experience we offer our students and of ESCP's distinctive European and international model," says **Prof. Thomas Jeanjean, Executive President and Dean of ESCP**. "Our students learn across countries, cultures and disciplines, but what matters most is what they do with that experience: developing the judgement, adaptability and ambition to navigate change and make a positive contribution wherever their careers take them."

Designed for flexibility, the MiM allows students to develop hybrid profiles across disciplines and industries. As technology transforms the workplace, the programme

continues to evolve: students learn to use generative AI professionally and critically, while in the last year the MiM has added specialisations in **Consulting in the Age of AI, Cyber Risk Management, and the New Space Economy**.

“The MiM has long been built around flexibility and the hybridisation of skills, so we are not simply reacting to changes in technology and the job market,” says **Prof. Yannick Meiller, Associate Dean of the Master in Management programme at ESCP**. “Our aim is to equip graduates with the ability to combine strong expertise across functions and sectors with new capabilities, including the effective and responsible use of AI. It is this combination that will help them adapt and set them apart throughout their careers.”

This year, ESCP also welcomes the inaugural cohort of its [Global Master in Management](#) in collaboration with CEIBS (China Europe International Business School). This fast-track dual degree programme takes students to Shanghai, Paris, London, and Zurich over 14 months, further expanding the international opportunities available to ESCP MiM students.

About ESCP

ESCP was founded in 1819, making it the world’s oldest business school. Throughout its 200-year history, ESCP has remained committed to educating accountable, bold and creative leaders who launch trends, bring new solutions and initiate the codes of tomorrow.

ESCP’s six campuses in Berlin, London, Madrid, Paris, Turin and Warsaw are the stepping stones that allow students to experience ESCP’s European approach to management grounded in multiculturalism.

Every year, ESCP welcomes 11,000+ students and 6,000+ managers from 140 different nationalities. Its strength lies in its many business training programmes, both general and specialised (Bachelor, Master, MBA, Executive MBA, PhD and Executive Education), all of which include a multi-campus experience.

With innovation as the cornerstone, ESCP is accelerating academic research and business education to forge new pathways for a better future for all.
