

The 20 propositions with the highest evaluation

Rank	Topic	Proposition	Average score
1	Ecology	Encourage businesses to reduce packaging (economic incentives)	4.60
2	Ecology	Promote "green mobility" (e.g. Velib, Autolib, etc.)	4.55
3	Ecology	Set up the sorting and deposit system (that we find in Germany for example) in all European countries	4.42
4	Ecology	Create a European system of recycling	4.38
5	Ecology	Standardize economic legislation in Europe to make environmental measures more effective	4.38
6	Ecology	Raise awareness among very young Europeans through education. It is very easy to teach respectful and sustainable habits and small everyday gestures to very young children (for example using gamification in sorting etc.)	4.37
7	Ecology	Concretely elaborate a European energy plan	4.32
8	Defence and security	Strengthen cooperation to fight new threats such as cyber terrorism	4.31
9	Ecology	Set up a synergy between economy and ecology, two concepts that are not incompatible (e.g. encouraging the agricultural transition through CAP, enhancing the competitiveness of solar energy actors, etc.)	4.30
10	Economy	(Tax) Prohibit "rulings" (Starbucks, Google, Amazon, Facebook) and limit tax optimizations	4.29
11	Ecology	Create a common colour code in all countries for sorting out trash cans	4.27
12	Education	Start teaching foreign languages earlier in pupils' schooling	4.27
13	Education	Encourage students to start an exchange program right from the middle school	4.26
14	Ecology	Change mindsets on the importance of ecology through the media	4.25
15	Ecology	Subsidize local agriculture and local distribution	4.24
16	Politics and citizenship	Communicate more about Europe, that decisions and speeches are more present in the media	4.22
17	Health	Extend the validity of the European Health Insurance Card and put in place its automatic renewal	4.20
18	Culture	Create a European cultural pass that would have advantageous prices in several countries	4.18
19	Agriculture	Prefer local distribution networks to support farmers that suffer the pricing effects (e.g. support the creation of points of sale to avoid passing through supermarkets that take off a huge proportion of profits)	4.16
20	Ecology	Ensure the consistency of commercial agreements and the European ecological will (e.g. privileging local producers rather than reaching an agreement with Latin America over the meat) and consider ecology an important criterion in the negotiations of the various agreements passed by the European Union	4.15
